ABOUT ME

I am a motivated and hard-working individual who is continuously developing new skills by creating audiovisual and interactive Digital Content. I consider myself a 3D generalist who is highly skilled in independently learning new techniques. So far, my work has had a focus on modelling, texturing, rigging, shading, lighting, rendering, and Programming.

My professional aim is to work in the film industry, I believe my skills and personality will add to the team to generate astounding Digital content. I am always trying to improve my work, and understand how other artist develop theirs, and solve any incoming problem.
