PERSONAL PROFILE

I am a professional graphic designer, passionate about communication technologies and creation through animation and multimedia. Having grown up with analogue media, I seek to know the how and why of things. Taking nothing for granted has led me to find creative solutions based on simple ideas.

I work hard to achieve balance in all the dimensions of my life. My professional experience ranges from diverse projects in small design and communication agencies to TV channels and the government, including free-lance ventures.

I enjoy teamwork and the interchange of ideas, particularly with like-minded people sharing my excitement for animation and creative work.
