## **SUMARY**

I am inspired by the natural and technological movement to create animations and digital compositions of real worlds or fantasy realities, as well as the assembly of a whole story integrated by the auditory and the visual to create the right message.

I was born and raised in Puebla, Mexico with a passion and desire to create stories and messages in a visual and auditory way. I studied Production and Direction of television in Asmedia CFP. In Puebla, and a certificate in VFX in Cardan FX.

I have managed to make audio visual pieces for agencies, TV channels, private clients, political groups in the region and production houses.

Most of the time I find myself in projects, but when I do not, I spend time updating and testing new techniques for the creation of creative and cutting-edge content, creating personal projects.
